Product Data Sheet

Mimosa Wax

Mimosa flower essential oil is a valued ingredient for the fragrance industry.

From this oil small quantities of essential wax are obtained.

Mimosa Wax is a hard, olive green wax which retains the light spicy fragrance of the essential oil. The composition of Mimosa Wax is typical for natural waxes, with about 40-45 % natural hydrocarbons, about 40-45 % esters and about 6 % free fatty acids.

The resemblance to for example beeswax and candelilla wax gives this product similar benefits.

A special property of Mimosa Wax is the fact that it shows almost no contraction upon solidification.

This special flower wax can be used in creams, lotions, colour cosmetics and as an ingredient in aromatherapy products.

Applications Emulsions, decorative cosmetics, aromatherapy

Specifications:

Colour:	greenish brown
Congeaing Point:	53 - 58 °C
Acid Value:	6 - 10 mg KOH/g
Saponification Value:	40 - 52 mg KOH/g
Form:	Slabs

<u>INCI Name</u>	Acacia Decurrens Flower Wax
<u>CAS No.</u>	93685-96-2
<u>EINECS No.</u>	297-646-0
