## **Product Data Sheet**

### **Rose Wax**

Rose essential oils obtained by extraction of Rose flowers are valued ingredients for the fragrance industry. From these oils small quantities of essential waxes are obtained. Rose Wax is a rubbery, medium hard wax of light yellow colour which retains the intense sweet floral fragrance of the essential oil.

In its composition Rose Wax shows similarities with Candelilla Wax and other natural waxes, with about 85-90 % natural hydrocarbons (ca. C19-C39, esp. C19-C31 & C35) and about 10-15 % esters (ca. C38-C58, esp. C40-C48).

This resemblance gives this product similar benefits.

Rose Wax can be used in creams, lotions and sticks and as an ingredient in aromatherapy products.

**Applications**     Emulsions, decorative cosmetics, aromatherapy

### **Specifications:**

Colour:	light yellow
Congeaing Point:	51 - 57 °C
Acid Value:	3 - 7 mg KOH/g
Saponification Value:	16 - 34 mg KOH/g
Form:	slabs
