### **Product Data Sheet**

#### **Narcissus Wax**

Narcissus essential oils obtained by extraction of Narcissus flowers are valued ingredients for the fragrance industry. From these essential oils small quantities of essential waxes are obtained.

Narcissus Wax is a brown, medium hard wax of which retains the spicy fragrance of the essential oil.

In its composition Narcissus Wax shows similarities especially with Candelilla Wax and with other natural waxes, with about 65 % natural hydrocarbons (ca. C21-C35 (almost exclusively C31 as in Candelilla Wax), about 30 % esters (ca. C36->C58) and small amounts of free fatty acids.

This resemblance gives this product similar benefits.

Narcissus Wax can be used in creams and sticks and as an ingredient in aromatherapy products.

**Applications**      Emulsions, decorative cosmetics, aromatherapy

#### **Specifikations:**

Colour:	brown
Congealing Point:	55 - 61 °C
Acid Value:	6 - 10 mg KOH/g
Saponification Value:	35 - 55 mg KOH/g
Form:	slabs
